

**FAASTeam presents:**

# **INOP Equipment & Airworthiness**

If it's broke, get it fixed. This is the basic truth of airworthiness. In practice, it can be a bit more complicated than that. What do you do if there is a small tear in a passenger seat? Is the aircraft grounded? How about if the VSI isn't working?

Can you fly in daytime with an INOP landing light? The FAA has attempted to clarify airworthiness requirements by regulation and with a special Advisory Circular, but for many pilots this is still a gray area.

Join us for a presentation by Nariman Farsaie, CFI and A&P, which should help clarify the situation. We'll review the various regulations dealing with pilot and owner responsibility for airworthiness, and AC 91-67 "Minimum Equipment Requirements for General Aviation Operations under FAR Part 91". The topics will include a discussion of how the nature of the flight changes the equipment and instrumentation requirements, and a discussion of the differences between what are commonly called "squawks" and what often are called "known conditions."

Bring your FAR/AIMs and be ready to seek airworthiness clarity as a group. San Carlos Flight Center is committed to promoting safety in general aviation through our evening safety seminar programs. For more

## Event Details

**Wed, Jun 26, 2013 - 7:00 pm**

**San Carlos Flight Center**

655 Skyway Rd

Suite 215

San Carlos, CA 94070

**Contact: San Carlos Flight Center**  
**(650) 946-1700**
